GENERATIVE AI TECHNOLOGY

WHAT IS ARTIFICIAL INTELLIGENCE (AI)?

In its simplest form, artificial intelligence (AI) is a field, which combines computer science and robust datasets, to enable problem-solving. It also encompasses sub-fields of machine learning and deep learning, which are frequently mentioned in conjunction with artificial intelligence. These disciplines are comprised of AI algorithms which seek to create expert systems which make predictions or classifications based on input data. (Source: IBM.com)

HOW CAN AI HELP MY SWING?

Whether it's your batting average or swing velocity, baseball is a game of numbers where the smallest variance can make the biggest difference. Working with the most technologically advanced and skilled experts in this area, Rawlings has pioneered new breakthroughs in bat construction that will directly correlate to improved offense. Our patent pending AI technology utilizes a system of supercomputers to develop and evaluate thousands of inner wall variations. The result is the most optimal, finely tuned barrel design made to date. This process results in increased precision and consistency to ensure you're getting the most out of each at bat.

Compression refers to the pounds of force (lbs) necessary to compress the ball ¼ inch.

RED DOT® 3-PIECE TECHNOLOGY

A step above competitor's 2-piece softballs: that is why the best players in the nation choose Rawlings. The inner core uses Rawlings' proprietary dense cell formulation, creating a ball worthy of being the Official Championship Softball of the NCAA® and NAIA®. With the addition of the C-LOK™ adhesive and moisture barrier, the improved pro-leather cover with just the right amount of tack, there is no wonder why Rawlings has a rich tradition in fastpitch softball.

Balls without Rawlings' C-LOK™ and poly-core combination can absorb moisture and lose compression (get softer).

C-LOK™ plus Rawlings' proprietary dense cell poly-core technology repels moisture and maintains higher compression.

DREAM SEAM® HIGH-DENSITY CORK

For teams wanting the distinctive sound and feel of cork, Rawlings offers a complete line of NFHS®, ASA®, USSSA®, NSA® and ISC™ cork game balls. Made of high-density cork and Rawlings' patented Dream Seam® Technology, they offer the performance you demand while giving a lower cost option in game balls.

RIF® TRAINING BALLS

Rawlings was the originator of RIF® balls designed to reduce the severity of ball impact injuries. Since the original RIF® game balls, Rawlings has expanded its offering to practice-level soft-training balls. These products are great for outdoor as well as indoor training.
