TECHNOLOGY

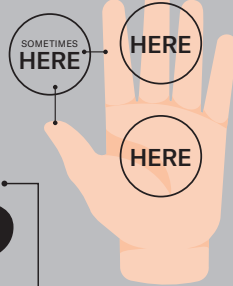

A **PATENTED** dimpled texture in our iconic Pro Stock<sup>®</sup> Leather designed to increase friction between the ball and your glove.

IT'S THE SAME PRO STOCK LEATHER YOU KNOW & LOVE IN A WILSON GLOVE ...

WITH DIMPLED TEXTURE ADDED TO THE PALM, FINGERS AND OCCASIONALLY THE WEB.

IN ADDITION TO OUR ON-FIELD WORK WITH BALLPLAYERS, WE'VE COLLABORATED WITH OUR PRO STOCK<sup>®</sup> LEATHER TANNERY AND AERODYNAMICS EXPERTS TO CREATE A2000<sup>®</sup> AND A2K<sup>®</sup> GLOVES THAT HELP PLAYERS CONTROL THE BALL WHILE MAKING PLAYS FASTER AND MORE CONSISTENTLY THAN EVER BEFORE.

## WHAT DOES IT ALL MEAN?

Spin Control Technology<sup>®</sup> is designed to help you corral the ball and cleanly transfer it to your throwing hand so you can deliver it to your target with speed and precision.

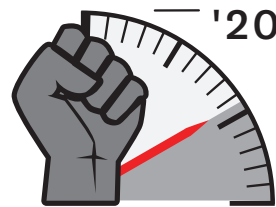

## WHAT MAKES THE SUPERSKIN<sup>™</sup> SO SUPER?

SuperSkin<sup>™</sup> is a carefully tested and refined microfiber material, perfected to deliver ultimate durability at the lightest weight possible. It repels moisture to keep your glove from getting bogged down by the weight of rain or wet grass. For years, other manufacturers have tried to create their own version of SuperSkin<sup>™</sup> using ballistic nylon, molded materials and more — only to come up short time after time.

## TIME TESTED

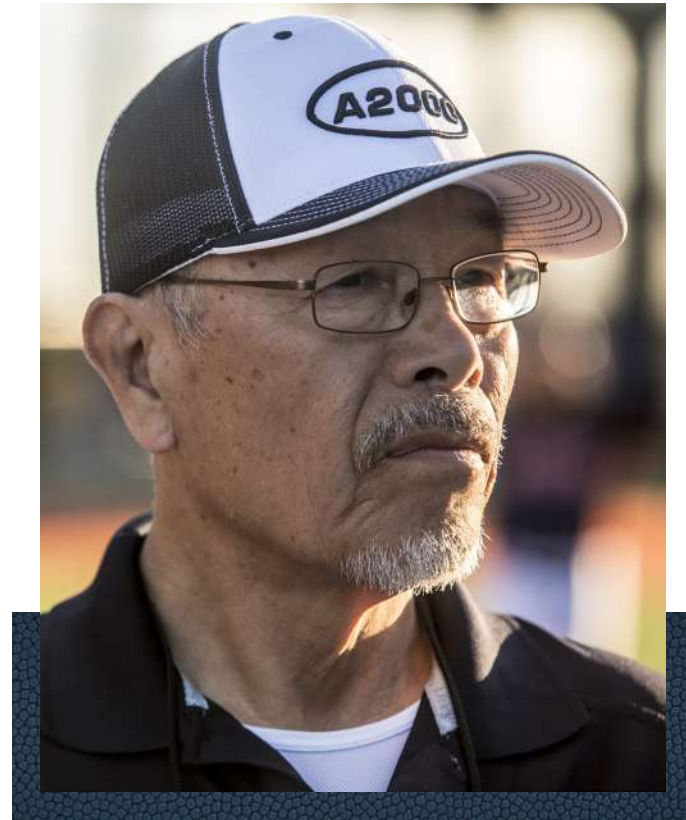

Since the 1990s, countless pros have sworn by their SuperSkin<sup>™</sup> gloves. Craig Counsell, who played 16 seasons in the Major Leagues, is just one example. Aso built him one of the first SuperSkin<sup>™</sup> gloves in 1999, and he used it until his retirement in 2011. Craig Counsell loved the glove so much, Aso said.

WILSON BALL GLOVE MASTER CRAFTSMAN

# SHIGEAKI ASO

If you love what you do, you'll never work a day in your life. Few individuals in the world embody that expression as much as Aso, who has dedicated his life to the game he loves.

THAT'S MY GOAL. I DON'T WANT A PLAYER TO THINK ABOUT THEIR GLOVE AT ALL. HIS SMILE IS MY SMILE. IF HE SMILES, I CAN SMILE.

- Shigeaki Aso

Wilson Baseball master Craftsman Shigeaki Aso has revolutionized the game for generations of players. His initial impact on the highest level of the game came in 1986 when he visited pro camps for the first time. With his decades of industry experience working with hides and leather quality control, he immediately noticed how common infield patterns featured long pinky and thumb stalls that were cumbersome to players.

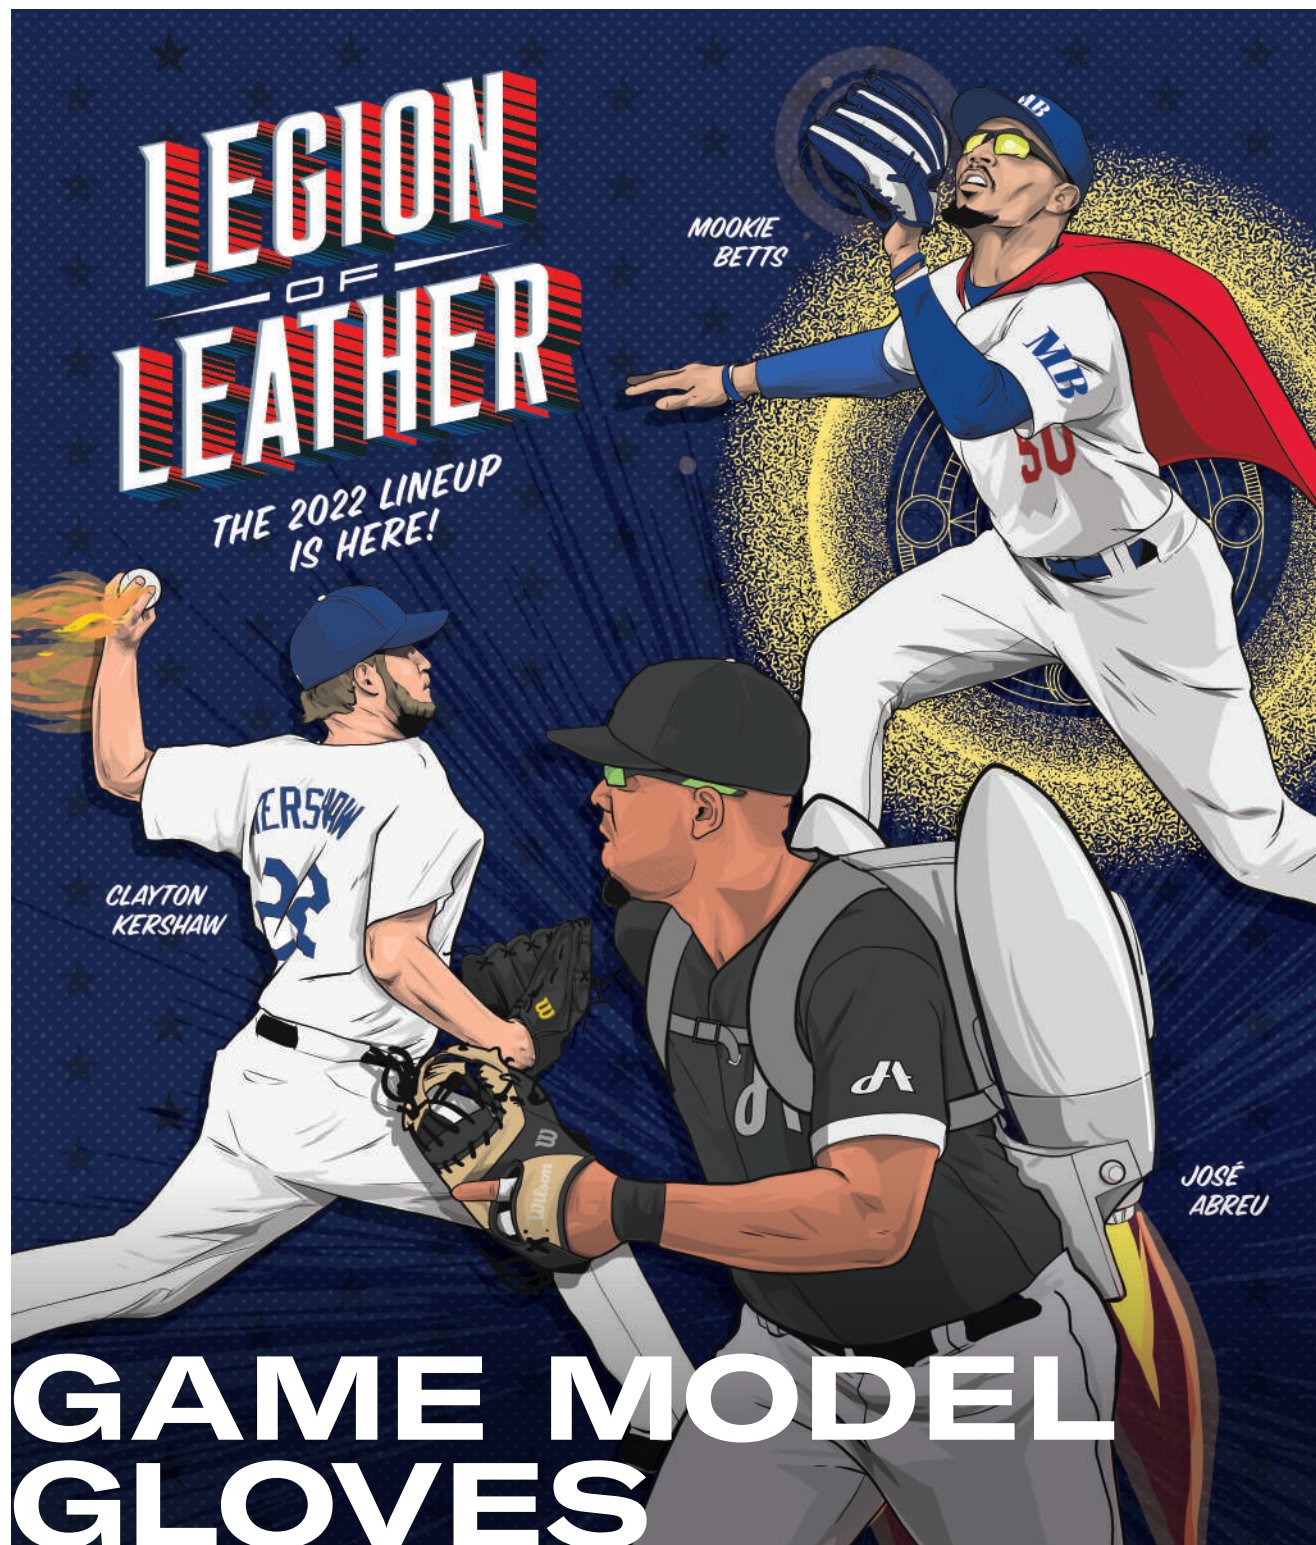

He gathered feedback from as many players as he could find. One year later, he returned with what is, to this day, the most popular Wilson pattern — the A2000<sup>®</sup> 1786. From there, Aso developed the A2000<sup>®</sup> 1787 and A2000<sup>®</sup> 1788, launching a legendary journey of creating ball gloves.

Aso's initial iconic glove patterns were just the first innovations to come from his relationships with players. Aso has put in countless hours with some of the best to ever set foot on the field. Those collaborative efforts continue to this day with elite talents like Mookie Betts, Tim Anderson and Clayton Kershaw.

Aso credits the still-present language barrier between himself and big leaguers for his detailed understanding of what players are looking for in their gloves.

"I'm not a very good English speaker, which is why I ask questions again and again to players," Aso said. "They explain very honestly what they want. If I spoke English better, would they explain things so well to me? But they make sure to explain everything well because that means they'll get a great glove."

These conversations lead to the constant evolution of Wilson ball gloves, from the groundbreaking development of SuperSkin<sup>™</sup> to more recent designs like Flat Finger Binding and Fastpitch-specific patterns and features. All these innovations share one common goal — ensuring that a player never has to think about their glove. It serves as an extension of the athlete, not an accessory.

## PURSuing PERFECTION

Wilson® Game Model gloves aren't just worn by professionals. They're designed by them. Wilson Ball Glove Master Craftsman Shigeaki Aso sits down with select Advisory Staff members — either in person or on a video call — to craft a Game Model glove designed specifically for their play.

Aso-san's relentless passion drives his pursuit of the perfect glove. He collaborates with players to receive detailed feedback and ensure each glove is built to work for the player's game. Every glove has unique features, from the laces to the webbing and even the materials used, culminating in an innovative line of Wilson Game Model gloves.

SPIN CONTROL TECHNOLOGY®

Wilson A2000® ball gloves with Spin Control Technology® feature a dimpled pattern in the same Pro Stock® Leather that you know and love. This textured pattern in the palm of your A2000® helps reduce the spin rate of the ball by rapidly increasing friction between the ball and the glove at the moment of contact.

**DIMPLED TEXTURE:**  
A patented dimpled texture added to our iconic Pro Stock® leather.

**INCREASED FRICTION:**  
The textured pattern is designed to increase the amount of friction between the ball and your glove, helping you to handle short hops in the field.

**ENHANCED CONTROL:**  
Spin Control Technology™ gives you more control to corral scorching line drives and hard grounders before making the transfer and hitting your target.

## FOR THE PROS, BY THE PROS

Wilson Game Model gloves aren't just worn by professionals. They're designed by them. Wilson Ball Glove Master Craftsman Shigeaki Aso sits down with select Advisory Staff members — either in person or on a video call — to craft a Game Model glove designed specifically for their play.

Aso-san's relentless passion drives his pursuit of the perfect glove. He collaborates with players to receive detailed feedback and ensure each glove is built to work for the player's game. Every glove has unique features, from the laces to the webbing and even the materials used, culminating in an innovative line of Wilson Game Model gloves.

## THE PREMIER GLOVE

A2000® gloves continue to evolve with the game. Durable Pro Stock® Leather offers a consistent feel and perfect break in. Comfort Pro™ Lining forms to your hand over time, pairing with our Comfort Sleeve wrist binding for the best feeling A2000® ever. Flat Finger Binding allows you to comfortably play with a finger out for improved control, and the Bold Logo package stands out on the diamond. The 2022 A2000® lineup also includes patterns built with Wilson's most innovative technologies, including the lightweight and durable SuperSkin™ and Spin Control Technology® — designed to increase friction between the ball and your glove.

1.

### PRO STOCK LEATHER®:

Made specifically for Wilson® ball gloves, this American steerhide is preferred by professional players for its rugged durability and unmatched feel.

2.

### SUPERSKIN™:

Twice as strong as traditional Pro Stock® leather, but only half the weight, giving players the durability they love in a Wilson glove in a lightweight design.

3.

### SPIN CONTROL TECHNOLOGY®:

A patented dimpled texture in our iconic Pro Stock® leather designed to increase the amount of friction between the ball and your glove, giving you more control.

4.

### DRAWSTRING CLOSURE:

Make in-game glove adjustments on the fly and ensure a secure fit in the field. Pull the long rawhide lace to set your wrist closure into place for the perfect fit.

GAME READY

Grounders, line drives and fly balls don't stand a chance against A1000™ ball gloves, models crafted with soft yet sturdy leather that is game-ready on day one. There's no long winter break-in or sore knuckles from punching the leather. The A1000™ is ready to make an immediate impact whenever you are.

### DOUBLE PALM CONSTRUCTION (FRONT SIDE):

A thin, perfectly shaped piece of leather placed between the palm liner and outer shell, giving you what matters most: maximum pocket stability.

### FULL LEATHER CONSTRUCTION:

Leather shell, laces and pal liner. These ball gloves expertly break in and conform to your hand.

### LOW PROFILE HEEL (FRONT SIDE):

Gives more flexibility, opens up the palm and pocket and makes it more forgiving on bad hops.

### DRAWSTRING CLOSURE:

Make in-game glove adjustments on the fly and ensure a secure fit in the field. Pull the long rawhide lace to set your wrist closure into place for the perfect fit.

# THE DIFFERENCE IS IN THE DETAILS

## KNOB MEDALLION

Easy-to-read medallions have been embedded in the knob and indicate the MLB® Prime® grade of wood, species and length, while the bat name is engraved in the surrounding area.

## EXOPRO FINISH

The MLB® Prime® lineup features the revolutionary EXOPRO finish that's twice as hard as the previous EXOARMOR®. This innovation in wood bat technology gives you a finish you can feel in an incredibly durable top coat that not only drastically increases surface hardness, but gives you a mirror-like finish in high-gloss models.

## SEAMLESS DECALS

Louisville Slugger's exclusive Seamless Decals are applied directly under the top coat, giving MLB® Prime® bats a pristine look. All MLB Prime models feature branding that blends into the bat almost as intricately as the grain of the wood.

## CRAFTSMAN-STYLE CUP

Our completely re-engineered Craftsman-Style Cup features a thicker width edge along the end of the barrel, lending added strength and durability to the end of the bat to help reduce chipping and cracking.

## 30-DAY LIMITED WARRANTY

All MLB® Prime® bats come with a 30-day limited warranty. Restrictions apply. Visit [Slugger.com](http://Slugger.com) for complete details.

## WOOD SPECIES

Louisville Slugger is dedicated to crafting wood bats perfect for each player. We offer three wood species: Maple, Ash and Birch. So no matter how you like your lumber, the team at Louisville Slugger has you covered.

### MAPLE

The dominant wood species in Major League Baseball, Maple bats are known for their surface hardness, stiffer feel and unmatched sound.

### ASH

The original wood species in Major League Baseball, Ash bats are generally lighter than other species and have a lighter weight feel and more flexibility upon contact.

### BIRCH

One of the newer, but fastest growing wood species in Major League Baseball, Birch bats feature a surface hardness close to that of maple but increased flexibility.

## SWING WEIGHT SCALE

Everyone talks about the length and weight of their baseball bat. But swing weight might be one of the most impactful ways to classify bats. Swing weight is a determination of how a bat's weight is distributed along its length. More weight toward the end of the barrel means you're swinging an end-loaded bat. These models create more momentum in a player's swing and generate more power and distance. Evenly distributed weight in balanced bats allow for a potentially greater swing speed for many hitters – perfect for players who focus on bat control and increased contact.

DURA-CORE TECHNOLOGY™

RED CUSHIONED CORK

## CORES BASEBALL

**DURA-CORE TECHNOLOGY™:**  
Added to Red Cushioned Cork to help the ball retain hardness. Formed to withstand impact and give you the game-changing performance you need.

**RED CUSHIONED CORK:**  
Gives a Wilson® baseball the ability to keep its shape and firmness, allowing for better pop off the bat.

SUPER SEAM TECHNOLOGY™

FLAT SEAMS

## SEAMS BASEBALL

**SUPER SEAM TECHNOLOGY™:**  
With seams 20% higher than raised seam baseballs, pitchers experience superior control on the mound. Fielders can locate the ball quickly in their gloves and throw with more accuracy.

**FLAT SEAMS:**  
The most aerodynamic Wilson® baseball, these balls fly further, giving both pitchers and hitters a true feel of the ball.

M3X CLASS OFFENSE DEFENSE

TRAVEL

The all-new M3X training machine is the first all-in-one crossover pitching machine of its kind. Designed as a smaller, more portable version of the M3 machine, the M3X contains all the same functionality as the M3, while combining the same features of the defensive R-Series machines by ATEC®

The all-in-one M3X crossover machine is also able to be converted to a fastpitch softball machine, by moving the motor placements to the outside settings, the M3X machine can be switched from throwing baseballs to softballs in minutes!

**Offensive Pitching:** Based off the ATEC® M3 machine, by utilizing three wheels, top speed, accuracy, and spin are maximized due to the ball's increased surface contact with the wheels. The M3X is equipped to throw 90mph giving you the ability to train against Major League level fastballs and both right and left handed breaking balls. Using only the speed control knobs, pitches can easily be dialed-in without making any physical adjustments to the machine, helping you improve the efficiency and effectiveness of your batting practice.

**Defensive Training:** Combining the functionality of the R-Series machines also give the M3X the ability to swivel 360 degrees, and control elevation from ground balls and fly balls in a split second. This gives the user the ability to execute hundreds of ground balls, line drives, fly balls and pop-ups in a single practice, giving your players more quality repetitions than could possibly be achieved with only a fungo bat.

The all new M1.J is the fastball only version of the popular M1 pitching machine. This machine is great for younger age groups and machine pitch leagues, with its lightweight portability and easy setup. With speeds of 30-70 MPH, this will allow the machine user to throw a straight fastball to match any player's abilities. It's built using the same technology, processes and materials as ATEC's other industry leading training machines. Similar to other high-end ATEC® machines, the M1.J is also equipped with a dual-durometer concave wheel. This wheel is engineered to increase the wheel's grip on the ball which maximize both pitch speed and accuracy. The M1.J also features a tilting throwing head, which allows the machine to throw ground balls and fly balls.
