THE FUTURE OF COMPOSITE TECHNOLOGY

3D ROPECOIL COMPOSITE TECHNOLOGY = **MAX PERFORMANCE, NO BREAK-IN REQUIRED**

3D ROPECOIL COMPOSITE TECHNOLOGY

CONNEXION Max

OPTI-FLEX HANDLE

Revolutionary barrel design in which 3-dimensional composite rope is wrapped vertically around the barrel at the sweet spot, coupled with optimized composite barrel thickness towards the end cap and taper, to create an expanded and maximum performing sweet spot.

ConneXion Max™ technology amplifies energy transfer and offers an overall solid feel at contact. A new elastomer connector interlocks the handle to the barrel while eliminating vibration at contact.

Brand new OptiFlex Handle is designed to the exact specifications that elite high school and college athletes demand. Each handles' stiffness is optimized to the length and drop weight of each bat, directly enhancing feel and power output on every swing.

-------------------	----	----------	-------	-------	-------	-------	-------

A new direction for composite barrel technology is here with ROPE. First of it's kind, innovative 3D Rope Coil Composite closes the gap in performance between composite barrels and alloy barrels right out of the wrapper. 3D Rope Coil Composite provides the maximum allowed performance with no break in required.

- **3D Rope Coil Composite:** Easton's patented 3-dimensional composite rope is wrapped 360 degrees, vertically, around the center of the barrel at the sweet spot. Surrounded by optimized thickness composite sections toward the end cap and taper to maximize performance outside of the sweet spot, creating the widest max performance area across the entire barrel. This unique design governs performance set directly at the performance limit.
- **Swing Weight:** Light swing weight feel with a lower MOI, produces more bat speed and barrel control.
- **ConneXion Max™:** Utilizes an elastomer connector to interlock the handle to the barrel, eliminating vibration for optimal feel.
- **OptiFlex Handle:** Driven by ongoing research and feedback from some of the game's best players, each bat size's handle flex is specifically engineered to the elite BBCOR athlete.
- **Two-Piece Composite Construction:** Composite handle + composite barrel creates a larger barrel, with the biggest sweet spot and an unmatched feel.
- **Power Boost Soft Knob:** Provides hitters with more leverage, while reducing vibration and improving comfort for the bottom hand.
- **Flow-Tack Grip:** Comfortable and tacky grip for best feel and control.
- **Certification:** BBCOR

SPLIT

INSANE PERFORMANCE

THINNER ALLOY WALL.
BIGGER SWEET SPOT.
CRAZY POWER.

Easton's patented inner core technology is comprised of a high performance alloy barrel layered internally with lightweight composite. The CompCore™ allows for a 30% thinner alloy wall which creates an overall higher performing barrel across the entire sweet spot.

Connects the stiff composite handle to the aluminum barrel allowing the handle and barrel to act independently, eliminating vibration and maximizing energy transfer.

The unique two-piece hybrid design is highly sought after by elite BBCOR athletes for its powerful barrel and stiff handle. The Split Hybrid offers a slight end load and a massive barrel for more power.

This one of a kind hybrid bat combines aluminum and composite within the barrel to finely tune barrel performance. CompCore™ technology and a thinner alloy walls creates the maximum allowed performance over a larger area of the barrel; while a slightly end loaded swing weight and stiff feel all together delivers maximum power.

- **CompCore™:** Easton's patented inner core technology combines lightweight composite with the strength of the highest performance alloy. CompCore™ allows for a 30% thinner alloy wall compared to competitors, creating a higher performing barrel.
- **Swing Weight:** Slight end load feel with mass focused in the barrel for more power.
- **PureLynk CXN™:** Connects the handle directly to the barrel allowing the handle and barrel to act independently, eliminating vibration and maximizing performance.
- **Pro-Stiff Carbon Handle™:** Designed with extra-stiff carbon fibers to create a more-solid handle, giving the elite athletes a stiffer feel.
- **Two-Piece Hybrid Construction:** Composite handle with alloy + composite-lined barrel, designed with a stiff handle and powerful barrel.
- **Power Boost Soft Knob:** Provides hitters with more leverage, while reducing vibration and improving comfort for the bottom hand.

THE LOWEST BARREL COMPRESSION IN USSSA BASEBALL

DOUBLE BARREL

The thin, low compression outer barrel allows more barrel flex across the length of the entire barrel while the inner barrel governs performance so the bat performs as close to the USSSA 1.15bpf limit as possible. All of this results in harder and more consistent contact.

CONNEXION Max

ConneXion Max™ technology amplifies energy transfer and offers an overall solid feel at contact. A new elastomer connector interlocks the handle to the barrel, virtually eliminating all vibration at contact.

BEYOND LIMITS

DOUBLE BARREL EXT

SONIC COMP MAX

VRS 1

Easton's revolutionary Double Barrel EXT design provides a 1" longer sweet spot with the highest allowable performance across the entire hitting area.

Easton's highest-performing composite material, resulting in maximum performance with the lowest barrel compression and iconic sound heard across all fields.

Reverse-engineered internal connection point creates the feeling of a 2-piece bat, minimizing vibration and optimizing performance. The lightweight design alleviates extra weight in the taper in order to create a longer barrel.

THE BAT THAT CHANGED THE GAME... JUST GOT BETTER

SUPERIOR PERFORMANCE.
ENHANCED DURABILITY.
ICONIC SOUND.

DOUBLE BARREL

Patented Double Barrel construction is the standard in barrel construction innovation. The low compression outer barrel and durable inner barrel work together to provide a massive sweet spot with maximum pop.

CONNEXION

Improved barrel to ConneXion™ durability without sacrificing performance, while maximizing energy transfer and eliminating vibration.

SONIC COMP

Easton's Sonic Comp™ technology is meticulously designed with the lowest barrel compression and more durability, resulting in superior performance and iconic Ghost sound.
